## MORSE CODE BRACELET GUIDE

We can translate this code into colors and weave a hidden message into our bracelets!

## BRACELET TIPS:

- Set out your bead pattern before you start assembling your bracelet.
- You can use a piece of turned over tape to hold your pattern in place!
- I start with my word pattern first and then add a few beads to each side of it to balance out the design evenly on each side.
- You can cut your cord into 3 foot lengths if you want to make 3 small bracelets with approximately 26 beads or cut it to 4 foot lengths to create 2 larger bracelets.

## EXAMPLE:

Let's use an orange bead for "dots" and a red bead for "dashes" with spacer beads in between letters.

## DESIGN SKETCHES:

Use the below dots to plan out your own design! A small bracelet will be 26 beads.
